Centive Solutions   www.centivesolutions.com

Centive Solutions offers a software platform allowing professional users who work with computer 3D models to experience their creations in immersive virtual reality in a simple, affordable and qualitative way. This helps understanding the 3D model and communicating it efficiently between colleagues or to clients avoiding unnecessary misunderstandings along the way. Today, our solution is used for internal verification of 3D models and in sales applications by companies around Europe.

Ville Stohne, COO and Co-founder, ville.stohne@centivesolutions.com

Christoph Blömeke, CSO and Co-founder, christoph.bloemeke@centivesolutions.com

Challengera   www.challengera.com

All fundamental work processes that all companies have in common are being made more efficient as we speak through digitalization. Cleary, cascading initiatives internally is one such process – and an important one. At Challengera we help our clients to execute on their strategic initiatives while driving accountability, recognition and hence engagement internally. We do this with a cloud-based social tool – as a stand-alone or to integrate to your existing platforms.
The result? We secure business results faster for some of the most amazing companies (Fortune 100) out there. We have great cases both on 'soft topics' (such as 'core values' or CSR cascading) & 'hard business metrics' (SKUs reduction in complex manufacturing environment or Cash Conversion Cycle).

Magnus Malmberg, Co-founder, magnus@challengera.com
Arnaud Henneville, Co-founder, arnaud@challengera.com

Dreamler   www.dreamler.com

Dreamler is an online tool available on multiple devices that helps groups of people with a shared vision to improve quality of their plans and the realisation by making process discovery and planning a more collaborative and visual activity.

Mathias Gullbrandson, CEO, mathias@dreamler.com

Elsip   www.elsip.se

Elsip is a semiconductor IP company, solving the traffic congestion challenges in multicore circuits, thereby unleashing their true potential. Our customers are semiconductor companies and OEM companies designing their own semiconductor solutions, either fully customized (ASIC) or using industry standard programmable platforms (FPGA). Elsip is a spinoff from KTH - Royal Institute of Technology - in Stockholm, Sweden.

Adam Edström, CEO, adam@elsip.se

Leia Media   **www.leiamedia.com**

Leia Media's mission is to deliver information globally in an environmentally and economically sustainable manner, through our revolutionary ePaper solution. Leia Media's e Paper solution features three integrated elements; 1) Leia ePaper; 2) a cloud-based media server; and 3) a M2M radio application. Leia is a tablet-like eReader that is powered 100% by solar energy. It is the world's thinnest, yet durable eReader. Leia's cloud-based media server allows content owners (publishers) the ability to keep their materials up-to-date, always and everywhere. Our unique radio application provides the last-meter Bluetooth connection to Leia.

Antti Korhonen, CEO, antti.korhonen@leiamedia.com

Severalnines   **www.severalnines.com**

Severalnines provides automation and management software for database clusters. We help companies deploy their databases in any environment, and manage all operational aspects to achieve Severalnines availability. Severalnines' goal is to provide the full 'deploy, manage, monitor, scale' cycle to developers, thus freeing them from the complexity and learning curves that are typically associated with highly available database clusters.

Jean-Jerome Schmidt, VP Marketing, jj@severalnines.com

Unomaly   **www.unomaly.com**

Based in Stockholm, Unomaly is a new way of monitoring critical systems – self learning, data driven and change oriented. It automatically understands normal and detects incidents, problems and issues due to their anomalous nature. Founded 2010, our vision is to contribute to drastically lowering the global impact of the unknown by making it naturally visible. We believe this will act as a catalyst for the rapid change and continuous improvement that is required for businesses to innovate.

Matias Cuba, VP Sales, matias@unomaly.com
